Education & Coursework

Bhagwan Parshuram Institute of Technology, GGSIPU Delhi 2022 – 2026
B.Tech in Electronics and Communication Engineering (Minor in Computer Science), CGPA: 7.7
Relevant courses: Data Structures & Algorithms, Machine Learning, C++, C, Computer Networks, Mobile Computing

Experience

Software Development Intern Aug 2024 – Nov 2024
American Business Solutions Inc. (Remote) Ohio, USA

- Built a component-driven React front end with Material-UI, crafting responsive, role-based dashboards for employees and admins, optimized for all screen sizes.
- Leveraged Redux to handle real-time task assignments and attendance data flows, ensuring smooth performance and state consistency.
- Streamlined critical workflows (login, attendance, task forms) using React Hook Form for validation and error handling, boosting UX

Web Development Head Aug 2024 – Present
Google Developer Student Clubs, BPIT Delhi, India

- Strategized and led AR workshop with Snapchat, targeting 150+ participants.
- Mentored juniors in UI/UX design, component architecture, and responsive layouts.
- Drove iterative feedback loops and code-quality improvements across GDSC web initiatives.

Game Development Head Jun 2023 – Aug 2024
Google Developer Student Clubs, BPIT Delhi, India

- Led 15+ technical workshops (80% YoY engagement increase).
- Organized the Spheres Challenge with 1000+ participants in cross-functional cycles.
- Hosted Google Cloud & GenAI workshops with Newton School, scaling tech adoption.
- Coordinated 70+ GDSC chapters across NCR in the WOW team.

Projects

DelhiMart (Full-Stack E-com Interface) 2024
React.js, Tailwind CSS, Context API, React Router DOM, Vite

- Developed full-featured catalog, real-time filters, wishlist/cart, and multi-step checkout.
- Engineered route protection, session persistence via React Context API and localStorage.
- Designed responsive UI with animated product cards and dynamic galleries.
- Live: delhimart.netlify.app

SocialVibe (Instagram-like Platform) 2024
React18, Vite, Tailwind CSS, Framer Motion, Lucide React

- Built Instagram-inspired interface with demo login, dynamic feed, story viewer, and mock messaging.
- Used Context API for modular state (auth, posts, stories, messaging, theme); persisted via localStorage.
- Designed adaptive nav (sidebar/bottom) and integrated Framer Motion for smooth transitions.
- Mock data via Pexels API; Live: socialvibee.netlify.app

Cubescape (3D Endless Runner Game) 2023
Unity, C#

- Created low-poly infinite runner for Android with object pooling, collision physics, and scoring.
- Optimized mobile input, dynamic camera, and scene rendering; published on Google Play Store.

Technical Skills

- **Languages:** C++, JavaScript, Python, SQL
- **Frameworks:** React.js, Redux, MongoDB (database)
- **Tools:** Git, GitHub, Vite, Figma, VS Code, Unity, Tailwind CSS, Framer Motion
- **Domains:** Web Dev, Game Dev, UI/UX Design, REST APIs
- **Soft Skills:** Agile Communication, Collaboration, Documentation

Achievements

Top 10/300+ teams, **CodeClash Hackathon 2023**, BVCOE Delhi
Top 10/500+ teams (solo), **Vihaan Hackathon 2024**, DTU Delhi
Secured **2nd place** in Digital Electronics Competition by engineering a human-following robot (Arduino, IR and ultrasonic sensors, motor drivers)
Won **10+** state/school-level speech, writing, and debate competitions
Leetcode **300+** solved
